

Global Forex Treasury

Real-Time Information Portal for XRP Ledger Currency Pairs

White Paper

Version 1.3

Date: January 01, 2025

Website: [globalforextreasury.com](placeholder)

Status: Proprietary Platform – All Rights Reserved

Executive Summary

Global Forex Treasury is a proprietary, decentralized, zero-trust information dashboard providing real-time access to currency pair data on the XRP Ledger (XRPL).

The platform organizes over 20 global currency groups into intuitive, thematic tabs, offering live pricing, historical context, and direct trade links to XRPL DEX order books.

This is NOT a trading platform.

It is a transparency and navigation & Educational tool for researchers, historians, and self-directed traders.

All trades occur on-chain via the XRP Ledger, using the user's own wallet and login.

- No custody
- No data collection
- No backend
- No jurisdiction

Global Forex Treasury only provides information and direct links.

Critical Risk Warning

TRADING DIGITAL ASSETS IS EXTREMELY RISKY

Currency values on the XRP Ledger are volatile and subject to manipulation, illiquidity, and network risk.

Never trade with capital you cannot afford to lose.

Caveat Emptor — Buyer Beware. . No guarantees. No liability.

You must conduct your own research (DYOR).

Global Forex Treasury provides information only. It does not offer financial advice, endorsements, or guarantees.

All trading is at your sole discretion and risk.

All trades are on-chain, self-custody, and at your sole risk.

Platform Purpose & Design

Core Philosophy

Principal	Meaning
Transparency over speculation	Prices pulled live from XRPL order books
Education over Execution	Historical context + hyperthetical analysis
Proprietary Protection	Code and research protected – no forking, no tampering
Zero Trust	No cookies, no tracking, no backend

Key Features

Feature	Description
Wallet Connect (Top-Right)	Optional XRPL wallet connection for personalized trade links
Wallet Status Display	Shows connection state (e.g., "Connected: r***...")
20 Thematic Currency Groups	Organized by geography, history, and economic narrative
Unicode Currency Symbols	Fast-loading, scalable text icons (no images)
Live XRPL Data	Real-time prices from decentralized order books
Direct Trade Buttons	One-click to s1.ripple.com , xrpl.to , or onxrp.com
Daily holder rewards	12:00 GMT — auto-paid to qualifying wallets
Info Modals	Wikipedia-sourced history, flags, maps, hypothetical analysis
Token Burn Mechanism	1% per trade - deflationary supply control

WARNING:

Never trade with money you cannot afford to lose.

The XRPL DEX is decentralized — there is no recovery for mistakes, scams, or market crashes.

Group Structure (20 Total)Note: Legacy tokens (IQD, VEF, ZWD, etc.) are community-issued — not natively minted on XRPL.

RISK REMINDER

Many tokens are speculative with little real-world backing.

Hype ≠ Value. Never invest rent, food, or emergency money.

Currency Group Structure

#	Group Name	Slogan / Narrative
1	Currency Revaluation	<i>"Economics 101 – Supply and Demand"</i>
2	Southern Africa Self Determination Accord	<i>"New Dawn for Southern Africa"</i>
3	Historic Currencies of Value	<i>"Lost Empires, Hidden Value"</i>
4	Britannic Four Crowns	<i>"4 Kingdoms, back to Financial Independence and Wealth"</i>
5	Pre-Euro Currency Values	<i>"The Euro Killed the Golden Age – Independence = Prosperity"</i>
6	North American Cascades	
7	Latin & Central America	
8	Caribbean Basin	
9	Sub Sahara Southern African (SADC)	
10	West, Central & East Africa Belt	
11	North Africa & Middle East (Greater Levant & Maghreb)	
12	Europe & Britain (Euro Atlantic Realm)	
13	Scandinavia (Nordic & Baltic Realm)	
14	Eur-Asian Steppe Belt	
15	Indian Subcontinent	
16	Orient & Far East	
17	Austral Pacific Sphere	
18	Trade Agreements	<i>"Trade with Me Only so I can become very wealthy - What have you got to Barter?"</i>
19	Commodities	<i>"Two pounds of wheat for a day's wages... do not damage the oil and the wine!"</i>
20	SDR Members	<i>"Global watchdog – BIG Daddy is watching your economy!"</i>

Note: Many legacy currencies (e.g., IQD, VEF, ZWD) are not natively minted on XRPL. Prices reflect community trust lines and rumor-market liquidity.

Technical Architecture

Frontend: HTML5, CSS3 (Flexbox, **table-layout: fixed**), Vanilla JavaScript

Data: XRPL WebSocket + REST API

Wallet Integration: **xrpl.js** (optional connect)

Hosting: Static (GitHub Pages, Vercel, IPFS compatible)

No Backend / No Database / No Cookies

Responsive: Mobile-first, wraps at <600px

Open Source License: MIT (planned)

How It Works

1. User **connects wallet** (optional) → enables personalized trade URLs
 2. Selects a **tab** (e.g., *Revaluation Currencies*)
 3. Table loads **only relevant pairs** from XRPL
 4. Each row displays:
Flag | Name | Code | Pair | Price/XRP | 24h Δ | **Trade Button**
 5. Click name → **Info Modal** with:
Flag & map | ISO data | Usage dates | Backing (gold, oil, etc.)
Historical context | *Lost Potential* analysis (hypothetical growth math)
 6. Every trade → 1–2% token burn (if issuer-enabled)
-

Fee Structure, Burn, & Daily Rewards (User Transparency)

Global Forex Treasury Platform Fee \$0 - Free to use!

XRPL Network Fee ~0.000012 XRP per tx (≈ \$0.000006)

LP / AMM Fee 0.3% per trade (0.15% per side) - paid to liquidity providers

Token Transfer Fee 2% (set by issuer) - burn and reward redistribution

Burn Process Example (1% Rate)

Recommended Burn Rate: 1% Per Trade

- 1 User buys 10,000 IQD for 7.6 XRP
- 2 100 IQD (1%) deducted as transfer fee
- 3 100 IQD sent to issuer cold wallet
- 4 Auto-burn script runs → sends 100 IQD to
rBURNXXXXXXXXXXXXXXXXXXXX (blackholed)
- 5 100 IQD permanently removed
- 6 Verified on xrpl.to

Burns are public, on-chain, and irreversible.

Auto-Script for Daily Rewards & Burns (Technical Setup)

Daily Holder Reward Distribution (12:00 GMT) Qualifying wallets holding $\geq 1,000$ units of a supported token (e.g. USD, GBP, AUD) receive a pro-rata share of the daily fee pool. Example: IQD Daily Reward

Metric	Value
Total IQD traded (24h)	50,000,000
Transfer fee (2%)	1,000,000 IQD
Burn (50%)	500,000 IQD \rightarrow burned
Reward pool (50%)	500,000 IQD
Eligible holders	200 wallets
Avg reward	2,500 IQD per wallet

Component	Tool / Method
Script Language	Python 3 + xrpl-py library
Trigger	Cron job (Linux) or AWS Lambda (serverless)
Time	12:00 GMT daily
Steps	
1	Query XRPL for 24h transfer volume per token
2	Calculate total fees collected
3	Burn 50% \rightarrow send to rBURN...
4	Distribute 50% \rightarrow pro-rata to eligible wallets
5	Log transaction hashes \rightarrow publish on site
Hosting	AWS Lambda (free tier) or Raspberry Pi
Cost	< \$1/month
Fully automated.	No manual intervention.

Legal & Compliance

No jurisdiction — global, decentralized tool

Not a security — provides information only

Not registered with any financial authority

User responsibility — all actions are on-chain and self-custodied

FINAL WARNING

Speculative tokens may go to zero.

Hype is not a strategy.

Never trade with money needed for survival.

You are 100% responsible.

Security & Privacy

No private keys stored

No user data collected

No login required

All links open in new tab to XRPL DEX

Open for audit — full source available

Code is proprietary — no access, no forking

Proprietary Protection Statement

This platform represents over 2 month of original research, historical analysis, and custom development.

All code, design, and content are © 2025 Global Forex Treasury - All Rights Reserved.

Unauthorized use, copying, forking, or tampering is prohibited.

Malicious actions will be reported to XRPL community watch lists.

Future Development (Community-Driven)

2026 Q1 7-day charts

2026 Q2 Dark mode

2026 Q3 Multi-language

2026 Q4 IPFS mirror
